I look forward to seeing everyone on the zoom watching Harvey Demo. He is a great presenter.

We are still looking for members to step up and help us run GAW. If you would like to help please contact a board member, thank you in advance for your willingness to help.

President will be having a ornament Challenge this year and the drawing will be at the Holiday Party. We will be accepting ornament pictures in November and each member will be able to have one chance in the drawing you do not have to be in attendance to win or participate. We will have 5 gift certificates for woodcraft.

We do need member to signup for the Holiday party so if you thinking about please sign up I need to know numbers.

Thank you,

Hans

September GAW Meeting—Looking Ahead

At the September 2023 GAW Harvey Meyer will demonstrate *Turning a Hollow Globe Ornament*. Harvey will demonstrate how to turn a hollow globe ornament in an interactive remote demonstration from his home shop.

Describing the scope of his demonstration, Harvey says that “In this demo, I’ll turn a hollow globe ornament with a small finial on top and a thin delicate icicle for the bottom. I’ll start with a small 2X2X2 cube and attach it to a waste block. I’ll partially shape the globe, drill a hole to establish depth, and then hollow out the inside to reduce the weight. After hollowing, I’ll finish shaping the globe and continue drilling the hole until it comes through

the other end of the globe. Then I’ll begin turning the icicle. This will be turned from ebony and will be thin and delicate. It will have a tenon that will be glued into one of the holes in the globe. From the remainder of the ebony, I’ll turn a small finial for the opposite end of the globe. The finial will have a small hole drilled into it to receive a small hook. After it’s all glued together. I’ll discuss how I finish these.”

We hope that this will be our last remote only members meeting and that we will be able to meet in person for the October members meeting.

August GAW Meeting— Looking Back

Have a Ball! Turn a [thin wall hollow] Sphere with Rick Urban.

Rick Urban showed us a method for making a hollow sphere with a reasonably even wall thickness of about 1/8" which allows for a wide range of surface embellishments if that is what you might like to do. The processes can be easily modified to accommodate other goals. Rick included a review of blank selection, preparation, and orientation to avoid missteps getting started. He further showed his simple template for accurately shaping and sizing the sphere (both inside and out). If you missed it, the handout for the presentation can be found [HERE](#).

Instant Gallery

We will be remote again this month, so instant gallery entries should be submitted to:

editor@gawoodturner.org

Remember to include

- ◆ Your name
- ◆ Wood species (as many as are included in your turning)
- ◆ Finishes
- ◆ Any other details you wish to include

All entries must be submitted by the end of day Wednesday prior to the meeting.

Wood Safety

Following is a link to a Fine Woodworking chart (with information drawn from several professional organizations) that lists woods that are known to cause respiratory problems and/or allergic reactions:

<http://www.finewoodworking.com/1977/12/01/toxic-woods>

AAW also has information on wood toxicity: <http://www.woodturner.org/default.asp?page=toxicity>

Another list of Wood Allergies and Toxicity: <https://www.wood-database.com/wood-articles/wood-allergies-and-toxicity/>

Always protect yourself from wood dust, especially when sanding—just because a wood doesn’t appear on the list doesn’t mean its dust should be breathed!
